Site Services Quality Lead

We are currently seeking a Quality Lead with a solid understanding of quality management systems within an engineering and manufacturing environment.

The successful candidate will be the primary co-ordinator for the quality management processes within the Site Services team and will lead the development of new standards and processes to deliver high quality engineering services to the business.

The role requires close liaison with the manufacturing and services departments and will play an integral part in customer, regulatory and management system audits. Other responsibilities include preparing information for department reviews, leading investigation into non-conformances and change management.

Skills and attributes required to do this job include:

- Prior experience in the preparation of standards and procedures
- Negotiation and problem solving with tenacity
- Sound knowledge/proven experience in working with quality within an engineering environment
- Excellent written and verbal communication skills
- Analytical ability and critical thinking
- Attention to detail and good time management
- A willingness and proactivity to learn.

Industry experience in a technical role (e.g. HCP, Audit, Engineering) in dairy or other food manufacturing would be an advantage but is not essential.

Applications close: 5 February 2025

For further details and a position description please contact Ellen Burmester. To apply for the position please forward your letter of application and CV via email to: Ellen Burmester – People & Capability Systems Co-ordinator.
